1 Version control

Version	Date	Author	Changes
Version 1 - September 2026	1 st September 2026	L Coleman	First version of policy. Written due to new legislation.
Version 2 - September 2026	10 th September 2026	S. Murfin	Paragraphs 17.3 and 17.4 reviewed and revised to ensure alignment with current requirements and practice.

2 Aim of this policy

- 2.1 As proprietor of one or more academies, Forward As One CE MAT has a legal duty to ensure there is an allergy safety policy in place, which sets out the arrangements to reduce the risk for individuals coming into contact with their known allergens (e.g. food or contact allergens) and sets out emergency response plans. The board of Forward As One CE MAT has delegated this responsibility to the academy.
- 2.2 The academy has adopted this policy to set out the arrangements of its duty to ensure there is an allergy safety policy in place, which sets out the arrangements to reduce the risk for individuals coming into contact with their known allergens (e.g. food or contact allergens) and sets out emergency response plans.

3 Overriding principles

- 3.1 Children and young people with allergies are entitled to a full education. The academy is committed to ensuring that pupils with allergies are properly supported in school so that they can play a full and active role in school life, remain healthy, and achieve their academic potential. We want all pupils, as far as possible, to access and enjoy the same opportunities at school as any other child. This will include actively supporting pupils with allergies to participate in school trips/visits and/or in sporting activities.
- 3.2 To ensure a rigorous approach to allergy safety and supporting pupils with medical conditions, all staff must cross-reference this policy with the supporting pupils with medical conditions policy whenever they are dealing with a pupil with an allergy.

4 Inclusion

- 4.1 Some pupils with an allergy will have a disability as defined by the Equality Act 2010 and the academy will comply with those duties in the implementation of this policy and in all decisions made about individual pupils with allergies.

- 4.2 This policy sets out policies and procedures to ensure proactive steps are taken to meet the needs of children with allergies, and that they feel safe and included.

5 Definitions

- 5.1 **Allergy** is a medical condition in which the body's immune system has an abnormal reaction to normally harmless substances such as food, insect stings, contact allergens, and airborne allergens. Allergic reactions can range in severity from mild symptoms (such as a rash or runny nose) to anaphylaxis, which is a severe and potentially life-threatening reaction.

5.1.1 Common allergic conditions include:

- (i) Hay Fever (Allergic Rhinitis).
- (ii) Skin allergies (e.g. eczema, contact dermatitis, contact urticaria/hives).
- (iii) Food allergy.
- (iv) Asthma.

5.1.2 Less common allergic conditions include:

- (i) Allergy to insect stings.
- (ii) Allergy to medicines.

- 5.2 **Anaphylaxis** is a potentially fatal reaction affecting the Airway/Breathing/Circulation ("ABC"). Many individuals with allergies to food or insect stings are at risk of anaphylaxis.

- 5.3 **Asthma** is a lung disease caused by inflammation and tightening of the airways, it is frequently associated with allergy and anaphylaxis, because exposure to allergens can provoke an asthma attack, a potentially life-threatening condition.

- 5.4 **Intolerance** to foods or an ingredient that the body is unable to digest is different to allergy and does not cause a serious allergic reaction. It can cause long term health problems if not avoided. Common food intolerances include lactose and gluten. Coeliac disease is intolerance to gluten, found in rye, barley, and wheat.

6 Policy implementation

- 6.1 This policy is published on the academy's website and is available in hard copy on request from the school office.

The person with overall responsibility for the successful administering and implementation of this policy is the Headteacher.

The Headteacher has overall responsibility for this policy, including driving the implementation of the policy and ensuring:

- Sufficient staff are suitably trained to meet the known allergies of pupils at the academy.
- Induction training covers allergy safety.
- All relevant staff are made aware of the pupil's allergies and supply teachers are properly briefed.
- Cover arrangements are in place to cover staff absences/turnover to ensure that someone is always available and on site.
- Risk assessments for school visits, holidays, and other school activities outside of the normal timetable are completed, including allergen risk assessments.
- Individual healthcare plans (IHPs) are prepared where appropriate and are monitored. IHPs have Allergy Action Plans attached where they have been provided by healthcare professionals. These must be uploaded to Arbor and pinned to the top of the pupil's profile and clearly labelled as IHP/Allergy Action Plan.
- Annual review of this policy, in addition to where this policy is reviewed following an incident or near miss.

7 Identification that a pupil has an allergy

Ordinarily, the pupil's parent/carer will notify the academy that their child has an allergy. Parents/carers should ideally provide this information in writing addressed to Headteacher, including whether they carry any medication (e.g. an adrenaline autoinjector (AAI) device or asthma reliever inhaler). However, they may sometimes pass this information on to a class teacher or another member of staff. Any staff member receiving notification that a pupil has an allergy should notify the Headteacher as soon as practicable.

A pupil may disclose themselves that they have an allergy. The staff member to whom the disclosure is made should notify the Headteacher as soon as practicable.

- 7.1 Notification may also be received directly from the pupil's healthcare provider or from a school from which a child may be joining the academy. The academy may also instigate the procedure themselves where the pupil is returning to the academy after a long-term absence.

Where a child is starting school, or is new to the academy, the Headteacher or someone designated by them will make enquiries in advance of the child starting, including seeking information from any previous school and parents (or young person themselves

if appropriate), to ensure that appropriate support is in place from the first day of attendance.

Where a child is moving to a new school from the academy, their IHP and/or Allergy Action Plan should be shared by the Headteacher or someone designated by them, as part of the transition.

- 7.2 The academy will ask parents to inform them as soon as reasonably practicable when their child is diagnosed with a new allergy to ensure that appropriate support is in place.

8 Identification of staff and visitors that have an allergy

- 8.1 All staff members will be asked to notify the academy in writing if they have an allergy, including whether they carry any medication (e.g. an adrenaline autoinjector (AAI) device or asthma reliever inhaler). This must be detailed on the staff member's Arbor profile.
- 8.2 Wherever possible, information on allergy should be sought in advance from visitors ahead of their visit, especially if they are likely to be served food.
- 8.3 The academy should consider on a case-by-case basis at what point it seeks information from staff and visitors regarding allergy and at what point it provides information about allergy to visitors, especially if they are likely to be served food.
- 8.4 Staff members and visitors will ordinarily manage the condition/allergy themselves without any support or monitoring from the academy. If the visitor is a child, their parent will ordinarily manage their child's condition/allergy themselves without any support or monitoring from the academy.
- 8.5 Where appropriate the academy will consider whether it should revise external booking documents, contracts for third party use of the site and/or contracts with third parties providing services to reflect the provisions of this section.
- 8.6 Emergency response procedures will apply to all individuals on the academy site.

9 Procedure following identification that a pupil has an allergy – see Annex 1

Except in exceptional circumstances where the pupil does not wish their parent/carers to know about their allergy, the pupil's parents/carers will be contacted by the Headteacher or someone designated by them as soon as practicable to discuss what, if any, arrangements need to be put into place to support the pupil. Every effort will be made to encourage the child to involve their parents while respecting their right to confidentiality. If a decision is made not to inform a parent/carers then the reasons for this should be documented and the decision should be reviewed by a senior member of staff.

- 9.1 Unless the allergy is short-term and relatively straightforward (e.g., the pupil can manage the condition/allergy themselves without any support or monitoring), a meeting will normally be held to:
- Discuss the pupil's support needs.
 - Identify a member of school staff who will provide support to the pupil where appropriate.
 - Determine whether an individual healthcare plan (IHP) is needed and, if so, what information it should contain.
- 9.2 Where possible, the pupil will be enabled and encouraged to attend the meeting and speak on their own behalf, taking into account the pupil's age and understanding. Where this is not appropriate, the pupil will be given the opportunity to feed in their views by other means, such as setting their views out in writing.
- 9.3 The healthcare professional(s) with responsibility for the pupil may be invited to the meeting or be asked to prepare written evidence about the pupil's allergy for consideration. Where possible, their advice will be sought on the need for, and the contents of an IHP.
- In cases where a pupil's allergy is unclear, or where there is a difference of opinion, the Headteacher will exercise their professional judgement, based on the available evidence, to determine whether an IHP is needed and/or what support to provide.
- 9.4 For children joining the academy at the start of the school year, any support arrangements will be made in time for the start of the school term, where possible. In other cases, such as a new diagnosis, a newly identified allergy or a child moving to the academy mid-term, every effort will be made to ensure that any support arrangements are put in place within two weeks.
- 9.5 Where the academy becomes aware that a pupil has a severe allergy, it will treat this as a priority matter and ensure that an allergy action plan and any associated risk management measures are put in place without delay.

10 Records of pupils and staff with allergies

- 10.1 The academy will keep a list of all pupils and staff with an allergy, an up-to-date photo, what medication they are prescribed, (e.g. AAI) and whether the pupil has an IHP and an Allergy Action Plan.
- 10.2 The academy will keep a list of pupils and staff with known allergy (including an up-to-date photo and lists of their known allergen) in places where food may be served or handled (including food technology, science, craft, and art classrooms).
- 10.3 Such lists will be kept in areas accessible to staff only.

11 Individual healthcare plans (IHP) – see Annex 2

11.1 Children and young people should have an individual healthcare plan (IHP) if:

- 11.1.1 They have an allergy which has a functional impact on them in their school, college or setting.
- 11.1.2 They are at risk of harm as a result of their allergy; and
- 11.1.3 They require arrangements which are additional to, or different from those made generally.

11.2 Where it is decided that an IHP should be developed for the pupil, this shall be developed in partnership between the academy, the pupil's parents/carers, the pupil, and the relevant healthcare professional(s) who can best advise on the particular needs of the pupil; this may include the school nursing service. The local authority will also be asked to contribute where the pupil accesses home-to-school transport, to ensure that the authority's own transport healthcare plans are consistent with the IHP.

11.3 The aim of the IHP is to capture the steps which the academy needs to take to help the pupil to manage their condition and/or allergy and overcome any potential barriers to getting the most from their education. It will be developed with the pupil's best interests in mind. In preparing the IHP, the academy will need to assess and manage the risk to the pupil's education, health and social wellbeing, and to minimise disruption.

11.4 IHPs may include:

- Details of the medical condition, allergy, its triggers, signs, symptoms, and treatments.
- The pupil's resulting needs, including medication (dose, side-effects, and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, and dietary requirements. Also environmental issues, e.g. crowded corridors, or travel time between lessons.
- Specific support for the pupil's educational, social, and emotional needs – for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods, or additional support in catching up with lessons, or counselling sessions.
- The level of support needed (some children will be able to take responsibility for their own health needs), including in emergencies; if a pupil is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring.
- Who will provide this support, their training needs, expectations of their role, and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable.

- Who in the academy needs to be aware of the pupil's condition/allergy and the support required.
 - Arrangements for written permission from parents/carers and Headteacher for medication to be administered by a member of staff or self-administered by the pupil during school hours.
 - Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g., risk assessments.
 - Where confidentiality issues are raised by the parent/pupil, the designated individuals to be entrusted with information about the pupil's condition/allergy and this should be identified within the plan.
 - What to do in an emergency, including whom to contact and contingency arrangements; some children may have an emergency healthcare plan prepared by their lead clinician that could be used to inform development of their IHP.
- 11.5 The IHP will also clearly define what constitutes an emergency and explain what to do, including ensuring that all relevant staff are aware of emergency symptoms and procedures. Other pupils in the academy should know what to do in general terms, such as informing a teacher immediately if they think help is needed. If a pupil (regardless of whether they have an IHP) needs to be taken to hospital, staff will stay with the pupil until the parent/carer arrives, or accompany a pupil taken to hospital by ambulance.
- 11.6 Except in exceptional circumstances or where the healthcare provider deems that they are better placed to do so, the academy will take the lead in writing the plan and ensuring that it is finalised and implemented.
- 11.7 A pupil has an Allergy Action Plan and/or Asthma Action Plan issued by a healthcare professional, the IHP should attach it. All Action Plans will record whether the pupil is prescribed adrenaline. Whenever an updated Action Plan becomes available, the IHP should be reviewed to incorporate it.
- 11.8 Where a pupil is returning to the academy following a period of hospital education or alternative provision (including home tuition), the academy will work with the local authority and education provider to ensure that the IHP identifies the support the pupil will need to reintegrate effectively.
- 11.9 Where the pupil has a special educational need identified in an Education Health and Care Plan (EHCP), the IHP will be linked to, or become part of that EHCP.
- 12 Allergy and Asthma Action Plans**

- 12.1 Pupils with a known allergy to food or insect stings should be issued with an appropriate Allergy Action Plan by their healthcare professional. These are medical documents designed to facilitate emergency response including in the case of anaphylaxis and an asthma attack.
- 12.2 The relevant healthcare professional is responsible for the content of Allergy and Asthma Action Plans. Whenever an updated Allergy and/or Asthma Action Plan becomes available, the pupil's IHP should be reviewed and incorporate it.
- 12.3 The pupil's IHP should attach the pupil's Allergy and/or Asthma Action Plan(s).

13 Reviewing individual healthcare plans (IHP)

Every IHP shall be reviewed at least annually. The Headteacher (or someone designated by them) shall, as soon as practicable, contact the pupil's parents/carers and the relevant healthcare provider, to ascertain whether the current IHP is still needed or needs to be changed. If the academy receives notification that the pupil's needs have changed, a review of the IHP will be undertaken as soon as practicable.

- 13.1 Where practicable, staff who provide support to the pupil with the medical condition shall be included in any meetings where the pupil's condition/allergy is discussed.

14 Allergen risk assessment

- 14.1 In order to minimise the risk of individuals (whether pupils, staff or visitors, the academy will carry out an allergen risk assessment of the school environment, including:

- 14.1.1 Food and catering arrangements.
- 14.1.2 Classrooms and other learning environments (e.g., art rooms, science laboratories, food technology rooms).
- 14.1.3 Communal areas (e.g., canteen, dining hall, common rooms).
- 14.1.4 Outdoor areas (e.g., playing fields, nature areas).
- 14.1.5 Activities and events where food is present on school site (e.g., school fairs, celebrations).
- 14.1.6 Activities where other allergens are present on school site, e.g. animals.
- 14.1.7 A separate and specific risk assessment to manage the risk of exposure to allergens on external visits or trips.

- 14.2 The allergen risk assessment will be carried out by the Headteacher, in conjunction with relevant staff (including catering staff) and, where available, the school nursing service. The assessment will be reviewed at least annually and whenever there is a significant change to the school environment or catering arrangements.

14.3 The allergen risk assessment will identify:

- 14.3.1 Allergens present in the school environment, including airborne or through contact.
- 14.3.2 Pupils at risk of an allergic reaction.
- 14.3.3 Other individuals, specifically staff and visitors at risk of an allergic reaction, if known.
- 14.3.4 Measures to reduce the risk of exposure to allergens.
- 14.3.5 Procedures to follow if a pupil has an allergic reaction.

14.4 Where the risk assessment identifies a risk, the academy will take proportionate steps to manage that risk. This may include, for example, designated allergen-free zones, allergen-free options in the canteen, measures to identify children with allergy and measures to prevent cross-contamination.

15 **Staff training**

The Headteacher is responsible for:

- Ensuring that all staff scheduled to be on site (including permanent, new and temporary staff, regular volunteers, and any person responsible for before-school provision, free breakfast clubs or after-school clubs, peripatetic workers and agency workers) are aware of this allergy safety policy, trained in allergy awareness and emergency response and understand their role in its implementation at least annually. (This is not intended to include contractors carrying out work with no pupil facing role e.g. builders.)
- Working with the school nursing service, relevant healthcare professionals, and other external agencies to identify staff training requirements and commission training required.
- Ensuring that there are sufficient numbers of trained staff available to implement the policy and deliver against all IHPs and allergy actions plans, including any specific training needs required by an IHP and in contingency and emergency situations.

15.1 In addition, all members of school staff will know what to do and respond accordingly when they become aware that a pupil or any individual needs help.

Where specific conditions require specialist training, including but not limited to the use of adrenaline auto-injectors (AAIs), the management of anaphylaxis, the use of blood glucose monitors or insulin pumps, the management of epileptic seizures, and the management of asthma attacks, the Headteacher will ensure that sufficient staff receive

that training from an appropriately qualified healthcare professional, and that competency is confirmed before a member of staff is asked to provide support.

Allergy awareness training will be provided to all staff. This will cover the nature and prevalence of food and other allergies, the signs and symptoms of allergic reactions and anaphylaxis, how to use an AAI, and the steps to follow in an emergency.

A record of all staff training shall be maintained (see template at Annex 3 and should also be added to the whole-staff safeguarding training matrix). Training will be refreshed at regular intervals and whenever there is a significant change to the conditions affecting pupils at the academy.

15.2 Training will be delivered annually unless healthcare professionals involved in an individual's care advise otherwise and should be sufficient to ensure staff are competent and have confidence in their ability to support pupils and individuals with allergies, and to fulfil the requirements as set out in relevant IHPs and/or Allergy Action Plans.

Induction arrangements for new staff will include training on this allergy safety policy, allergy awareness, and emergency response.

The academy has in place appropriate levels of insurance regarding staff providing support to pupils with medical conditions, including the administration of medication. Copies of the academy's insurance policies can be made accessible to staff as required.

16 Allergy awareness training

16.1 Allergy awareness training should ensure all staff:

- 16.1.1 Have an awareness of allergy, the risks it poses, how allergic reactions can occur and how to manage it.
- 16.1.2 Understand that allergy includes multiple conditions (food allergy, asthma, eczema, hay fever, others), which can co-exist.
- 16.1.3 Understand the difference between food allergy, coeliac disease, and food intolerance.
- 16.1.4 Know where to find information on allergy triggers.
- 16.1.5 Can identify the range of symptoms of allergic reactions.
- 16.1.6 Understand and can recognise anaphylaxis.
- 16.1.7 Know how to respond in an emergency, including:
 - (i) Calling emergency services and informing parents.

- (ii) How to locate and administer emergency medication (adrenaline for anaphylaxis, asthma reliever inhaler for an asthma attack).
 - (iii) Training on how to use the medication/device in an emergency (whether prescribed to a given person or a school's "spare" adrenaline devices).
- 16.1.8 Understand the impact allergy can have on a child or young person's wellbeing.
- 16.1.9 Understand the school, college, or setting's allergy safety policy.
- 16.1.10 Know how to check whether an individual is on the record of those with known allergy and how to use an Allergy or Asthma Action Plan.
- 16.1.11 Understand their responsibilities in reducing the risk of individuals with known allergy coming into contact with their known allergens.
- 16.1.12 Understand how to report an allergic reaction or case of anaphylaxis (whether an incident or a "near miss"). This report must include:
 - Who was affected
 - What happened, when and where
 - Why the incident occurred (as far as is known)
 - How staff and pupils responded; what was done to support the person
 - Whether emergency services were called
 - How the incident concluded
- 16.2 Training under this guidance should be understood as allergy awareness and emergency response training. It should not be read as replacing any separate clinical governance, competency, or delegation arrangements that may be needed where a child or young person requires individual healthcare support beyond school-level allergy safety arrangements.
- 16.3 Raising allergy awareness with pupils will be carefully considered and managed in an age-appropriate way.
- 17 **Prescribed adrenaline and spare adrenaline auto-injectors (AAIs)**
 - 17.1 All AAIs will be stored at room temperature and not locked away or kept in any location where access is restricted.
 - 17.2 All AAIs will be stored the school office

17.3 Access to adrenaline devices during the school day

Pupils who are prescribed an adrenaline device (AD) will have rapid access to their individually prescribed device(s) at all times during the school day. The academy will ensure that appropriate arrangements are in place for the safe and accessible storage of prescribed ADs, taking account of the pupil's age, maturity and Individual Healthcare Plan.

Parents and carers are responsible for ensuring that any individually prescribed device provided to the academy is in date and replaced before it expires. The academy will also regularly check the expiry dates of medication held on site and will remind parents and carers when replacement medication is required.

Pupils at risk of anaphylaxis will have access to their prescribed AD during lessons, breaktimes and lunchtimes. Appropriate arrangements will also be made for school visits, trips, sporting activities and other off-site activities, so that the pupil's prescribed AD is available without delay.

17.4 Adrenaline devices outside the school day

Parents and carers are responsible for ensuring that their child has access to an in-date, individually prescribed AD when they are not in the academy's care, including when travelling to and from school.

Where separate prescribed ADs are kept permanently at the academy, parents and carers must ensure that their child also has an in-date prescribed device available for use outside school.

Where a pupil does not have separate prescribed devices held at home and school, the academy will agree appropriate arrangements with the pupil and their parents or carers for the individually prescribed AD to be taken home, including for the journey home and during school holidays.

These arrangements will be recorded, where appropriate, within the pupil's Individual Healthcare Plan. Parents and carers should check prescribed devices regularly and ensure replacements are obtained before they expire.

- 17.5 The academy will check expiry dates termly and inform parents/carers where a replacement is needed imminently.
- 17.6 The academy will hold spare adrenaline auto-injectors (AAIs) for use in an emergency where a pupil is known to be at risk of anaphylaxis.
- 17.7 The academy will maintain a supply of spare, clearly labelled AAIs for use in an emergency. Spare AAIs may be used where:

- 17.7.1 A pupil at the academy has been prescribed an AAI and is known to be at risk of anaphylaxis.
 - 17.7.2 The pupil's own AAI is not available (e.g., because it has been used, is out of reach, has expired, or has been lost).
 - 17.7.3 The pupil or other individual has had, or is judged to be having, an anaphylactic reaction.
- 17.8 Spare AAI's held by the academy are for emergency use only and are not a substitute for a pupil's own prescribed AAI. Parents/carers are still required to provide the academy with their child's in-date, personally prescribed AAI.
- 17.9 Spare AAI's will be stored in a clearly marked, accessible, and safe location known to all relevant staff. They will be contained in an 'emergency anaphylaxis kit' clearly marked as such, and separate to the first aid kit. They will be checked regularly to ensure that they are in date and functional and replaced as required. This will also include any emergency asthma reliever inhaler and spacers, and instructions for use of all equipment.
- 17.10 All AAI's and instructions for use will be stored in pairs and the academy will have two pairs of AAI's on each site. This will support with being able to take one pair on a school trip, for example, whilst leaving one pair for emergency use in school.
- 17.11 All staff will receive training in the recognition of anaphylaxis and in the correct use of AAI's. This will include training that in the event of an anaphylaxis, adrenaline should be administered as soon as possible and within five minutes.
- 17.12 Following any use of a spare AAI, the Headteacher will ensure that a replacement is obtained promptly and that a record of the use is made.
- 18 Allergen management in catering and food provision**
- 18.1 The academy recognises that the management of allergens in food provision is a critical safety issue for pupils (and staff and visitors) with food allergies.
- 18.2 The academy (or its catering contractor) will:
- 18.2.1 Ensure that allergen information for all food and drink provided to pupils, staff, and visitors is available and clearly communicated.
 - 18.2.2 Ensure that staff involved in food preparation and service are trained in allergen awareness and the prevention of cross-contamination.
 - 18.2.3 Ensure that allergen-free options are available for pupils, staff, and visitors with known food allergies, as reflected in the allergen risk assessment.

- 18.2.4 Ensure that catering contractors are made aware of pupils, staff, and visitors with known food allergies, and take appropriate steps to manage the risk.
- 18.3 The academy will use at least two robust methods of identifying pupils with known allergies at mealtimes.
- 18.4 The academy will ensure that food served at school events, including fairs, celebrations, parties, and school trips, is managed in a manner that takes into account pupils, staff, and visitors with known food allergies. Where the academy cannot control the allergen content of food served at an event, appropriate measures will be taken to ensure that affected pupils and individuals are kept safe, including consideration of what information is provided regarding allergens.
- 18.5 The Headteacher will liaise with the catering manager or contractor on allergen management and will ensure that any relevant information from a pupil's IHP or Allergy Action Plan is shared with catering staff on a need-to-know basis, in compliance with data protection requirements.
- 19 Emergency procedures - whole-school approach**
- 19.1 Nothing in this policy prevents any person taking reasonable action in good faith to save a child or young person's life if they experience a life-threatening medical emergency.
- 19.2 The academy adopts a whole-school approach to emergency preparedness in relation to allergies. This means that all staff, not just those directly named in a pupil's IHP or Allergy Action Plan, are equipped to respond appropriately in an emergency.
- 19.3 The Headteacher will ensure that:
- 19.3.1 Emergency procedures for the most common or highest-risk conditions affecting pupils at the academy (including anaphylaxis, severe asthma attacks, hypoglycaemic episodes, and epileptic seizures) are clearly documented and accessible to all staff.
 - 19.3.2 All staff are trained on what to do if they encounter a pupil in a medical emergency, an anaphylactic reaction, or acute asthma.
 - 19.3.3 Regular training and scenario-based exercises are carried out with staff to ensure preparedness, particularly in relation to anaphylaxis and other life-threatening conditions.
 - 19.3.4 Spare emergency medication (including spare AAls) is stored in an accessible, clearly marked location known to all staff.
 - 19.3.5 The location of emergency medication and the academy's emergency procedures are included in the induction of all new staff.

19.4 General emergency procedures (including calling 999 and first aid) are set out in template at Annex 3.

19.5 If a pupil, regardless of whether they have an IHP or Allergy Action Plan, needs urgent medical attention, staff will:

19.5.1 Call 999 immediately where there is any doubt about the seriousness of the situation.

19.5.2 Administer any emergency medication in accordance with the pupil's IHP/Allergy Action Plan (or, in the absence of a plan, their best clinical judgement).

19.5.3 Stay with the pupil until emergency services or a parent/carers arrives.

19.5.4 Notify the pupil's parent/carers as soon as practicable.

19.5.5 Complete a record of the incident.

20 **Serious incidents and near misses**

20.1 The academy recognises that however effective its policies and procedures are in relation to pupils, staff and visitors with medical conditions and/or allergies, they can never completely remove the risk of a serious incident happening.

20.2 Serious incidents and 'near misses' will be treated seriously and in accordance with the academy's health and safety policies and procedures.

21 **Support for the wellbeing of pupils with medical conditions and/or allergy**

21.1 Measures the academy will take to support the wellbeing of pupils with medical conditions and/or allergies, and allergy awareness may include:

21.1.1 The academy will involve the pupil's parents and, where appropriate, the pupil themselves in developing and reviewing their IHP.

21.1.2 The academy will ensure proactive communication to the school community about allergy, ongoing awareness, and severity of risk.

21.1.3 The academy will proactively engage with new joiners, for example by offering a tour of the canteen.

21.1.4 The academy will introduce 'allergy champion' roles as a point of contact for pupils.

21.1.5 The academy will ensure regular communication with members of the academy community about medical conditions, allergies, and the awareness and appreciation of ongoing risks.

21.1.6 The academy will address and respond to any bullying related to medical conditions and/or allergy under its anti-bullying policy.

21.1.7 The academy will consider any appropriate support to the pupil and their parent/carer following any serious incident.

22 Visits and trips

22.1 A separate and specific risk assessment to manage the risk of exposure to allergens on external visits or trips will be undertaken by the academy before every visit or trip.

22.2 Each specific risk assessment will assess every individual pupil, staff member, or volunteer need on the trip who has an allergy.

22.3 Every pupil, member of staff or volunteer with an AAI and/or asthma reliever inhaler will be required to take an in-date device with them on the trip.

22.3.1 The arrangements for the storage of pupils' AAI and asthma reliever inhaler will be with the member of staff in charge of the pupil's group.

22.3.2 All members of staff and volunteers will be expected to store and carry their own devices.

22.4 A pair of spare AAIs will be supplied for each visit or trip.

22.5 All staff on the trip will be trained in how to administer adrenaline in an emergency.

23 Unacceptable practice

Although the Headteacher and other school staff should use their discretion and judge each case on its merits with reference to the pupil's IHP, it will not be generally acceptable practice to:

- Prevent children from easily accessing their medication, AAIs or inhalers and administering their medication when and where necessary.
- Assume that every pupil with the same condition requires the same treatment.
- Ignore the views of the pupil or their parents/carers or ignore medical evidence or opinion (although this may be challenged).
- Send children with medical conditions home frequently or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHP.
- If the pupil becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable. In the case of an allergic emergency (anaphylaxis) help must come to the pupil, not the other way around.

- Penalise children for their attendance record if their absences are related to their medical condition, e.g., hospital appointments.
- Prevent pupils from drinking, eating, or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively.
- Require parents/carers or otherwise make them feel obliged to attend school to administer medication or provide medical support to their child. No parent/carer should have to give up working because the academy is failing to support their child's medical needs.
- Prevent children from participating or create unnecessary barriers to children participating in any aspect of school life, including school trips, e.g., by requiring parents/carers to accompany the child.

24 Information sharing.

- 24.1 A pupil's health information (including allergy) is considered special category data. The academy has a lawful basis to hold, use, and share a child or young person's special category health data. The academy will need to hold, use, and share this information in order to ensure the pupil receives the support they need to stay safe and be included in education.
- 24.2 All individual pupil health data will be stored and processed in accordance with the academy's student privacy notice.

25 Complaints

Complaints regarding this policy or the support provided to pupils with medical conditions should be raised under the academy's usual complaints procedure.

Appendix 1 A flow chart for identifying and agreeing the support a child or young person needs and developing an Individual Healthcare Plan

Appendix 2 DfE template: Individual Healthcare Plan for allergy

NAME – Individual Healthcare Plan for allergy	
Date of birth:	Current photo
Year / class:	
Emergency contacts:	
Staff who need to be aware:	
Allergy: <i>Note what allergy the child or young person has.</i> <i>Note any known allergens.</i> <i>Note whether the child or young person is likely to be aware that they are having an allergic reaction and whether they can alert others.</i>	
How the allergy is managed: <i>Note any care or action plans or prescribed medication issued by healthcare professionals.</i> <i>If the allergy can be partly or wholly managed by practical adjustments (for example avoidance of known allergens), note them here.</i> <i>Note the extent to which the child or young person is able to take responsibility for managing their allergy.</i>	
Impact on education: <i>Indicate the potential harm which might come to the child or young person if their allergy is not managed properly.</i> <i>Indicate how the allergy may impact on the child or young person's learning.</i> <i>Indicate how the allergy may impact on the child or young person's emotional wellbeing.</i> <i>If relevant, note any interaction between allergy and SEN.</i>	
Arrangements for support:	

Give details of the specific support or adaptations which the school, college or early years setting will put in place, within its educational remit.

Outline measures to reduce the risk of contact with known allergens.

Give details of the specific support or adaptations to manage food allergy at meal and snack times.

Note arrangements for maintaining educational progress where absence or missed learning occurs due to allergy.

Visits and trips:

Give details of any arrangements or procedures which may be required for school trips or other activities outside of the normal timetable that will ensure the child can participate.

Note any requirement for a risk assessment and prompts for specific issues which should be considered.

Emergency response:

Where an Action Plan issued by a healthcare professional covers emergency response, refer to it and ensure it is attached.

Otherwise summarise the signs or symptoms which would indicate an emergency.

Set out what to do in an emergency, including whom to contact.

If relevant, note where “spare” adrenaline devices are located.

Appendix 3 DfE Templates

(Supporting pupils at school with medical conditions)

Templates

Supporting pupils with medical conditions

May 2014

Introduction

In response to requests from stakeholders during discussions about the development of the statutory guidance for supporting pupils with medical conditions, we have prepared the following templates. They are provided as an aid to schools, and their use is entirely voluntary. Schools are free to adapt them as they wish to meet local needs, to design their own templates, or to use templates from another source.

Template B: Parental agreement for setting to administer medicine

The school/setting will not give your child medicine unless you complete and sign this form, and the school or setting has a policy that the staff can administer medicine.

Date for review to be initiated by

Name of school/setting

Name of child

Date of birth

Group/class/form

Medical condition or illness

Medicine

Name/type of medicine
(as described on the container)

Expiry date

Dosage and method

Timing

Special precautions/other instructions

Are there any side effects that the school/setting needs to know about?

Self-administration – y/n

Procedures to take in an emergency

NB: Medicines must be in the original container as dispensed by the pharmacy.

Contact details

Name

Daytime telephone no.

Relationship to child

Address

I understand that I must deliver the medicine personally to

[agreed member of staff]

The above information is, to the best of my knowledge, accurate at the time of writing and I give consent to school/setting staff administering medicine in accordance with the school/setting policy. I will inform the school/setting immediately, in writing, if there is any change in dosage or frequency of the medication or if the medicine is stopped.

Signature(s) _____ Date _____

Template C: Record of medicine administered to an individual child

Name of school/setting	
Name of child	
Date medicine provided by parent	
Group/class/form	
Quantity received	
Name and strength of medicine	
Expiry date	
Quantity returned	
Dose and frequency of medicine	

Staff signature _____

Signature of parent _____

Date			
Time given			
Dose given			
Name of member of staff			
Staff initials			

Date			
Time given			
Dose given			
Name of member of staff			
Staff initials			

C: Record of medicine administered to an individual child (Continued)

Date			
Time given			
Dose given			
Name of member of staff			
Staff initials			

Date

Time given			
Dose given			
Name of member of staff			
Staff initials			

Template D: Record of medicine administered to all children

Name of school/setting

Date	Child's name	Time	Name of	Dose given	Any reactions	Signature	Print name

Template E: Staff training record – administration of medicines

Name of school/setting

Name

Type of training received

Date of training completed

Training provided by

Profession and title

I confirm that _____ has received the training detailed above and is competent to carry out any necessary treatment. I recommend that the training is updated _____

Trainer's signature

Date

I confirm that I have received the training detailed above.

Staff signature

Date

Suggested review date

Template F: Contacting emergency services

Request an ambulance - dial 999, ask for an ambulance and be ready with the information below.

Speak clearly and slowly and be ready to repeat information if asked.

1. Your telephone number.
2. Your name.
3. Your location as follows [insert school/setting address].
4. State what the postcode is – please note that postcodes for satellite navigation systems may differ from the postal code.
5. Provide the exact location of the patient within the school setting.
6. Provide the name of the child and a brief description of their symptoms.
7. Inform Ambulance Control of the best entrance to use and state that the crew will be met and taken to the patient.
8. Put a completed copy of this form by the phone.

Template G: Model letter inviting parents to contribute to individual healthcare plan development

Dear Parent

DEVELOPING AN INDIVIDUAL HEALTHCARE PLAN FOR YOUR CHILD

Thank you for informing us of your child's medical condition. I enclose a copy of the school's policy for supporting pupils at school with medical conditions for your information.

A central requirement of the policy is for an individual healthcare plan to be prepared, setting out what support the pupil needs and how this will be provided. Individual healthcare plans are developed in partnership between the school, parents, pupils, and the relevant healthcare professional who can advise on your child's case. The aim is to ensure that we know how to support your child effectively and to provide clarity about what needs to be done, when, and by whom. Although individual healthcare plans are likely to be helpful in the majority of cases, it is possible that not all children will require one. We will need to make judgements about how your child's medical condition impacts on their ability to participate fully in school life, and the level of detail within plans will depend on the complexity of their condition and the degree of support needed.

A meeting to start the process of developing your child's individual health care plan has been scheduled for xx/xx/xx. I hope that this is convenient for you and would be grateful if you could confirm whether you are able to attend. The meeting will involve Mrs Ireland and your child's class teacher. Please let us know if you would like us to invite another medical practitioner, healthcare professional or specialist, and provide any other evidence you would like us to consider at the meeting as soon as possible.

If you are unable to attend, it would be helpful if you could complete the attached individual healthcare plan template and return it, together with any relevant evidence, for consideration at the meeting. I would be happy for you contact me via the Gorsefield email (gorsefield@bury.gov.uk) or to speak by phone if this would be helpful.

Yours sincerely

Appendix 4 Allergen risk assessment template

What are the hazards for each activity?	What are you already doing to control the risks?	Probability	Impact
Medication:			
<u>Storage:</u> Location of each student's medication Location of generic 'spare' AAI Consider: • is there consistency of container throughout the school to make it easily identifiable? • Is the student able to self carry their own medication? • Is the back up medication always within 5 mins of where the students are? Are multiple sites needed for back up medication? • Is the students and back up medication always accessible regardless of the time of day?			
Training:			
Check that the course has medical input/review Training should be updated annually Ideally all staff would be trained. If this is decided against, a rationale based on risk assessment should be produced. Consider: Will there always be a member of staff available to administer an AAI throughout the school day who is not further than 5 minutes away from the student at any given point. Course must include: • Signs and symptoms of allergy & anaphylaxis			

• Emergency response • Administration of adrenaline auto-injectors • Prevention of reactions Ideally would include: • Types of allergen: food and non-food • Curriculum • Trips & visits including sports • Reporting and recording			
Food and drink:			
<u>Catering:</u> • What systems are in place to ensure that the student eats safely? Do all the catering and lunchtime staff know who has allergies and how to ensure that they are safe. Do they know how to report near misses and what to do should a reaction occur? • What measures do you have in place for liaison with the catering contractor and lunchtime supervisory staff? • Ensure up to date allergen information is available for each menu and that it is easily accessible, ideally on school website. • Make sure that any unexpected changes to the menu and allergens are communicated urgently to student/parent/guardian so that a different choice can be made. • Ensure that allergen matrix is available and kept up to date.			

The FSA have a free to download one: https://www.fooddocs.com/food-safety-templates/food-allergen-chart Consider: - wrap round care - break times - lunch times			
<u>Events involving food:</u> - Cake sales - Parties - Other PTA events - Drinks • How can these be made inclusive? • What are the risks if the allergens are present during the events? Is handwashing possible? • What information has to be shared ahead of the event to remind all about the exclusion of an allergen if this has been agreed. Allergen Matrix can be found here: https://www.fooddocs.com/food-safety-templates/food-allergen-chart • Are allergens displayed, where appropriate to the event?			
<u>Celebrations:</u> • Consider discouraging cake and sweets for children as treats both for birthdays and school celebrations. • Where food is used, consider the impact for the students with allergies and discuss with			

parent/carer/student at the earliest opportunity to plan for a safe and inclusive event.			
Curriculum activities:			
<u>Cooking:</u> • Adapt recipes for all to create a safe cooking space. If a recipe cannot be adapted, can a different recipe be used? • Has the allergic student got their own set of cooking materials? • Are allergies included in the food technology curriculum so that all students have awareness of the impact of allergies to the health of the allergic person. • Are all students made aware of the impact of their actions on an allergic person should the specific allergens not be excluded? • Are all students taught about cross contamination and the impact of this?			
<u>Creative activities: e.g. junk modelling. pasta</u> • When using packaging ensure that the allergens have not been in those packets; for example: crunchy nut cornflakes should not be in a classroom where a student has a peanut allergy. When students are bringing in materials from home, ensure that communication is sent to parent/carers to specify what			

they are unable to bring in and monitor this when the packaging comes into school. Plastic containers should be washed in hot soapy water to remove allergens.			
<u>Music: instrument sharing (cross contamination issue)</u> - Do instruments have to be shared? - Do blowing percussion instruments have to be shared? How can they be sterilised if they do? Can the allergic student have their own blowing instrument that they don't need to share?			
<u>Science activities:</u> - Review the science curriculum and see where allergens are used. Consider whether these have to be used and whether there are alternates that can be used? If essential, the activity needs to be individually risk assessed for the allergic student. How can that lesson be made inclusive and safe? - Consider the impact of cross contamination and whether this could cause a reaction for the allergic student.			
<u>PE:</u> Consider: Indoor Outdoor Forest Schools Where emergency medication is kept during PE and how quickly it can be accessed. If it is			

left in the classroom/changing room and is needed, how quickly can it be found? Is it easily identifiable and can it be with the student within 5 mins? - Is there an allergy trained member of staff present during after school clubs? - Is there an allergy trained member of staff accompanying away sporting events?			
Break time: Consider: Playground Field - Where emergency medication is kept during breaktimes and how quickly it can be accessed. If it is left in the classroom and is needed, how quickly can it be found? Is it easily identifiable and can it be with the student within 5 mins? - Is there an allergy trained member of staff present during break times?			
School animals:			
Consider: Therapy dogs and the access they have to children with allergies. Is there an allergen free area that the student will be safe in?			
Visitors & supply staff:			
Consider: Has the visitor been made aware of the school's policy?			

• If there is an allergy free zone that has been created due to a student's individual risk assessment, how has this been communicated to the visitor/supply staff? • Does the visitor need to know about the student's allergy? Will they be using the student's allergen? Do they need to know they have to have eliminated cross contamination from themselves through handwashing after eating?			
Offsite activities:			
<u>Day trips:</u> Consider: • Is there a specific allergy section on the visit/experience risk assessment? • Is there an allergy trained member of staff accompanying the visit? • Storage of AAls • Availability of emergency services and nearest hospital • Is there a good phone signal? If not, how will communication work? How will emergency services be called? • Is food being taken or served? It may be necessary to request that other students do not bring specific allergens on the trip to reduce risk during the day. Communication with venues and parent/carers to set out expectations.			

- Are any of the activities during the day high risk to the allergic student; inform venues and agree control measures, aim for inclusivity. <u>Residential visits including D of E:</u> Consider: - Storage of AAls for each activity being undertaken & overnight - Availability of emergency services and nearest hospital - Is there a good phone signal? If not, how will communication work? How will emergency services be called? - What food is being served? Consider cross contamination. Do any menu changes need to be made to ensure safety? Will the allergic person have sufficient to eat? Does any food need to be taken? - Can students eat food in rooms? - Is there a specific allergy section on the visit/experience risk assessment? - Is there an allergy trained member of staff accompanying the visit? - Do other students need to understand signs, symptoms of allergy, how to call for help and administer an AAI?			
Other:			

This must be completed for any activity that is medium with the aim of bringing the risk to LOW.

Activities that are High or Extreme must **not happen** unless action can be implemented to bring the risk to LOW.

Hazard	What further action do you need to take to control the risks?	Who needs to carry out the action?	What is the action needed by?	Completed

Consequence		Minor	Moderate	Major	Critical	Catastrophic
Likelihood	Rare	Low	Low	Low	Low	Low
	Unlikely	Low	Low	Medium	Medium	Medium
	Possible	Low	Medium	Medium	High	High
	Likely	Medium	Medium	High	High	Extreme
	Certain	Medium	Medium	High	Extreme	Extreme

Consequence	Minor	Moderate	Major	Critical	Catastrophic
This is the impact of the action being allowed to happen	No reaction	Non anaphylactic reaction	Emergency response required, ambulance and hospital	Emergency response required, ambulance and hospital	Fatal, Death

Likelihood	Definition
Rare	May only occur in exceptional circumstances
Unlikely	Could occur in some circumstances, surprised if happened
Possible	Possible or likely to occur in most circumstances
Likely	Will occur in most circumstances
certain	It is expected to occur, inevitable
